A 10x10 grid heatmap visualization. The color scale ranges from orange (low values) to dark blue (high values). The high values (dark blue) are concentrated in the top-right corner, forming a triangular shape. The low values (orange) are concentrated in the bottom-left corner, also forming a triangular shape. The grid is outlined with thin black lines. A small black dot is visible in the bottom-left cell (row 10, column 1).
